

Dear Participant of "12-th Polish Workshop on Relativistic Heavy-Ion Collisions",

We have composed the program, available at

<https://indico.cern.ch/event/544641/timetable/#20161104>

Please, verify if your contribution is properly located. Due to a large number of contributed talks we were forced to make the presentations quite short (please, note that the last 5 min. of the allocated time is reserved for discussion). We were also reluctant to shorten coffee or lunch breaks, as they contribute to the loose spirit of the meeting, with much time for interaction. We hope you understand and make your presentations to the point.

We understand that some of you may arrive late or leave early. We will appreciate this information, as this will allow us to make catering adjustments.

See you soon in Kielce!
