MACIEJ ANDRZEJ RYBCZYNSKI

has successfully completed the online Specialization

Linux Foundation Certified System Administrator (LFCS)

This certificate recognizes the successful completion of the Linux Foundation Certified System Administrator (LFCS) specialization. The recipient has demonstrated proficiency in essential Linux management tasks, including networking, software management, and process scheduling. Through a comprehensive curriculum, they have enhanced their security skills, focusing on local security settings, firewalls, and access control using AppArmor or SELinux. Additionally, they have gained expertise in storage management, containers, virtualization, and open-source technologies such as LDAP and Git. This program has also prepared them for the Linux Foundation LFCS exam.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
